

## Retraction: Bilateral acute angle closure glaucoma following a snake bite: Are we missing it?

The article titled, “Bilateral acute angle closure glaucoma following a snake bite: Are we missing it?” published in pages 40-43, issue 1, vol. 20 of Indian Journal of Critical Care Medicine<sup>[1]</sup> is being retracted. It has been reported and found that the article contains overlapping text sections from another article titled, “Ocular Manifestations of Venomous Snake Bite over a One-year Period in a Tertiary Care Hospital” previously published in pages 256–262, issue 4, vol. 29 of Korean journal of Ophthalmology<sup>[2]</sup>. Therefore, on the grounds of duplicity of text, the article in concern is being retracted.
