Retraction: Successful management of massive intraoperative pulmonary fat embolism with percutaneous cardiopulmonary support

The article titled, “Successful management of massive intraoperative pulmonary fat embolism with percutaneous cardiopulmonary support”, published in pages 136-139, issue 3, vol.12 of Indian Journal of Critical Care Medicine[1] is being retracted. The article has found to contain overlapping text sections from a previously published article titled, “Use of percutaneous cardiopulmonary support in catastrophic massive pulmonary fat embolism”, published in pages 213-215, issue 2, vol.96 of British Journal of Anaesthesia[2]. Thus on the grounds of duplicity of the text, the concerned article is being retracted.
